Technical Papers

Access full-text preeminent, cutting-edge research articles covering the latest advances in aerospace technology.

> The best venue that allows me to help develop communication skills in young engineers is SAE, because you get potential access to respected, peer-reviewed technical paper publications, and the opportunity to present your information in front of 500 or so people—live, which makes this process so important.
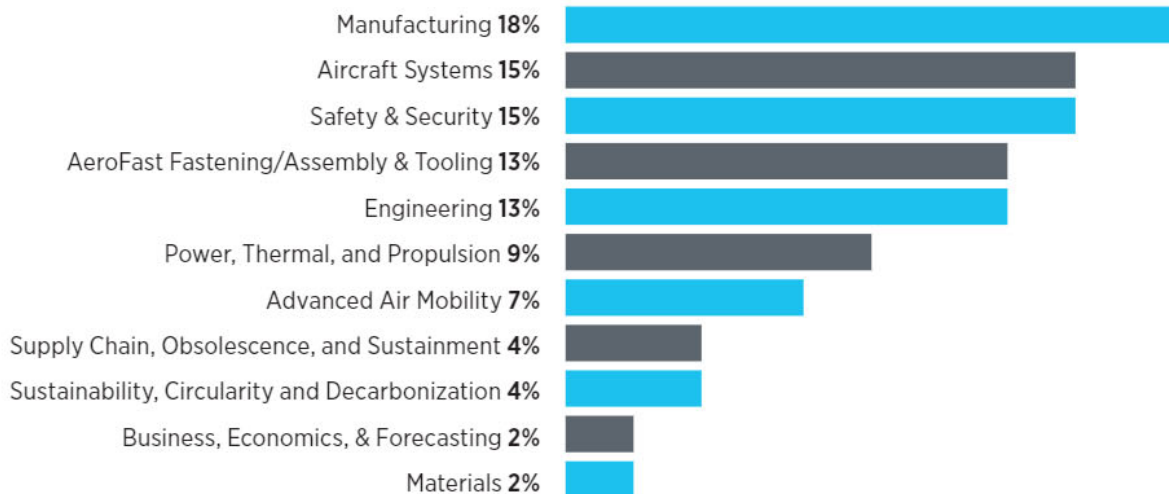

Dr. Jim McCarthy Jr.
EATON CORPORATION

AeroTech® 2023 Technical Papers

Reference SAE's Technical Papers for the latest research in aerospace and defense, with a deep dive on sustainability, advanced air mobility, electric and connected aircraft, advanced manufacturing, and so much more.

The in-depth test results, comparative studies, and methodologies can help guide you and your team through project challenges and establish leadership in a competitive landscape.

This year's papers cover a diverse range of topics*

Topic	Percentage
Manufacturing	18%
Aircraft Systems	15%
Safety & Security	15%
AeroFast Fastening/Assembly & Tooling	13%
Engineering	13%
Power, Thermal, and Propulsion	9%
Advanced Air Mobility	7%
Supply Chain, Obsolescence, and Sustainment	4%
Sustainability, Circularity and Decarbonization	4%
Business, Economics, & Forecasting	2%
Materials	2%

This data is approximate and was accurate at the time of printing.

Available in the following subscription options:

TechSelect
A cost-effective and convenient way to access the SAE technical papers dating back to 1906.

Technical Papers – 1998-Present
Our largest and most popular subscription, and includes all technical papers published from 1998 through the present.

10-Year Rolling Subscription
Most recent 10 years of technical papers; can purchase archive of the papers preceding the most recent 10 years.

Design a customized SAE Mobilus subscription for your team or classroom
