3.6 Supplementary Electronic Content

SAE recognizes the opportunity to include alternative electronic content to support and enhance SAE online technical publications. The list of acceptable content types is evolving, but initially SAE will accept audio/video files in MPG format and Microsoft Excel spreadsheets in native format. For future consideration of other multimedia file types, please send suggestions to techpaper@sae.org.

Note that binary computer programs are not currently acceptable as supplementary content. Note however that text versions of such programs can be included as an attachment. Apply the [Monotype] style to control spacing and character alignment.

All supplementary content should be submitted as an attachment using Microsoft Word's Insert Object tool to insert supplementary files at the end of the technical paper. Be sure to select the *Display as Icon* checkbox. Supplementary attachments require the same peer review as the paper contents. Be sensitive to the file size of the attachment—attach *compressed* files whenever possible.

Supplementary electronic content will not be available in SAE print products and will not exist as independent objects with their own DOI (Digital Object Identifiers). Supplementary electronic content should be chosen only when the material cannot be represented in the paper.
