

# Technical Papers

Access 109,000+ Full-Text Preeminent, Cutting-Edge, and Historical Research Articles for Both Industry and Educational Use

SAE Technical Papers bring exclusive, peer-reviewed research and historical industry assets to one customizable library for you and your team. Gain access to over a century's worth of academic works—plus the latest in industry research—to support work across automotive and aerospace engineering, and which will help foster collaboration, recognition, and innovation among engineers around the world.

Powerful, industry-leading data made available from a wide variety of important topics with a range of custom pricing options. Unique to SAE, this comprehensive catalog features application-based research for use in both industry and academia. These papers contain in-depth information and research on a variety of topics, and include test results, comparative studies, methodologies, case studies, best practices, review articles, and more.

*“The best venue that allows me to help develop communication skills in young engineers is SAE, because you get potential access to respected, peer-reviewed technical paper publications, and the opportunity to present your information in front of 500 or so people—live, which makes this process so important.”*

- Dr. Jim McCarthy Jr., Eaton Corporation

## The answers to the biggest challenges in mobility engineering today

### SAE Mobilus Access Drives Teams Forward

Newly-enhanced search and robust indexing capabilities allow users to search for a specific paper, conduct primary research on a topic, industry, or sub-category, and easily find key answers to help solve the most challenging engineering problems in the field or in the classroom. Customize your dashboard and share information related to your team's work easily through an SAE Mobilus subscription.

#### Direct Annotation

Highlight and comment on publications for sharing with research groups or colleagues easily.

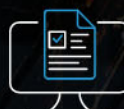

#### Always Current

Papers are made available as soon as they are ready, and event technical papers are published one week prior to being presented at events.

#### Drill-Down Search and Filtering

Comprehensive indexing and filter options for a seamless search experience.

#### Customizable Subscription Options

With technical papers dating back to 1906, you can customize your annual subscription for specific time periods or purchase the full archive in perpetuity.

# The knowledge you need to transform how we move

Original scholarly documents provide applied research to guide design, implementation, and safety decisions and equip engineering teams to make informed decisions about their work. Industry experts and world-renowned university researchers write, peer-review, and publish many new technical papers exclusive to SAE every year.

Technical papers are gathered from events or submitted directly to SAE as standalone publications. The approval process includes a double-blind peer review process, completed by experts in the field. The papers contain quality data and valid analytical techniques, and provide clear and logical research findings and sound conclusions for readers, while remaining free of personal bias and commercialism. Citation tracking is provided in partnership with Dimensions and these papers are indexed in Scopus and Engineering Village (Ei Compindex).

## RELEVANT TOPICS IN AUTOMOTIVE AND AEROSPACE

- Accident Reconstruction and Occupant Protection
- Aircraft and Aerospace Technology
- Connected and Automated Vehicles
- Cybersecurity
- Energy Efficiency and Sustainability
- Engines and Combustion Processes
- Hybrid and Electrified Vehicles
- Simulation and Modeling

## PUBLICATIONS AUTHORED BY EXPERTS FROM TRUSTED INSTITUTIONS AND CORPORATIONS

- Airbus
- Boeing
- The University of Cambridge
- Clemson University
- ETH Zurich
- Ford Motor Co.
- General Motors Corp.
- Kettering University
- Massachusetts Institute of Technology
- The University of Michigan
- Nissan Motor Co.
- Shanghai Jiao Tong University
- Stanford University
- Tongji University
- Toyota Motor Corp.
- Tsinghua University

## SUBSCRIPTION OPTIONS

Subscription	Details
Technical Papers - 1998-Present	Our largest and most popular subscription and includes all technical papers published from 1998 through the present
Backfile A	Subscription to historical technical papers published between 1990-1997
Backfile B	Subscription to historical technical papers published between 1980-1989
Backfile C	Subscription to historical technical papers published between 1974-1979
Backfile D	Subscription to historical technical papers published between 1966-1963
10-Year Rolling Subscription	Most recent 10 years of technical papers; can purchase archive of the papers preceding the most recent 10 years.
